7

A Semantic Index to Greenberg's Amerind Etymologies

In *Language in the Americas* (1987) Joseph Greenberg presented over 2,000 etymologies in support of the Amerind family and its eleven subgroups. Each etymology was identified by an English gloss, but no comparable phonetic gloss was given. Since it is useful to have both a semantic gloss and a phonetic gloss in identifying an etymology, I first added phonetic glosses to all the etymologies and then alphabetized this semantic index. The index allows one to see at a glance which phonetic shapes are associated with which meanings in the Amerind family. Consideration of this list has led me to conclude that in a fair number of cases Greenberg should have combined etymologies from different Amerind subgroups into additional, more comprehensive Amerind etymologies (see Chapter 8 of the present volume).

This chapter presents, then, a complete semantic index to the 2,003 Amerind etymologies contained in Greenberg's book. Each entry consists of (1) a semantic gloss, (2) a phonetic gloss, and (3) the etymology number. For grammatical etymologies the distribution of the etymology is also indicated. In addition, some suggestions of possible overlap or further consolidation are

indicated after certain etymology numbers. The following abbreviations are used: A: Amerind, AK: Almosan-Keresiouan, P: Penutian, H: Hokan, CA: Central Amerind, CP: Chibchan-Paezan, AN: Andean, E: Equatorial, MT: Macro-Tucanoan, MG: Macro-Ge, MP: Macro-Panoan, MC: Macro-Carib, G: grammar section (in Chapter 5 of Greenberg). For Amerind etymologies (i.e. those etymologies that include at least two Amerind subgroups) the semantic gloss is given in boldface type; etymologies restricted to one Amerind subgroup are given in plain roman type. For example, "ASK *kɬal* AK10" means that Greenberg's tenth Almosan-Keresiouan etymology associates the meaning 'ask' with the phonetic form *kɬal*; "**ANGRY** *iri* A4" indicates that Amerind etymology No. 4 associates the meaning 'angry' with the phonetic form *iri*; and "AUNT *pan* AN9; =CA1; =MP63" means that Andean etymology No. 9 associates the meaning 'aunt' with the phonetic form *pan,* and furthermore that this particular sound/meaning relationship is similar to that posited by Greenberg for Central Amerind etymology No. 1 and Macro-Panoan etymology No. 63. Finally, "ACCUSATIVE *s* G42 [P]" means that Greenberg's grammatical etymology No. 42 (in his Chapter 5) is an accusative marker *s* that appears to be restricted to the Penutian branch of Amerind. The subscripts on the meaning glosses may seem, at first sight, confusing. For example, for the gloss DANCE, two entries have no subscript, three have the subscript 1, and three have the subscript 2. This is, however, simply a reflection of the fact that different branches of Amerind have different words for DANCE, and some branches have more than one.
